

Technical Notes

The Center's data will continue to be updated this month as the annual data revisions are released by BLS and EDD.

In addition, the final approved maps by the 2020 California Citizens Redistricting Commission have been released. The Center for Jobs will be updating the California maps and data across the website in early 2022 to reflect the new legislative district boundaries. We will continue to cover data for the 2012 district boundaries throughout most of the year, but will begin to transition to the 2022 district data and estimates as this information is developed.
