

### Jobs Change by Industry

Using the unadjusted numbers that allow a more detailed look at industry shifts, 5 industries showed job levels at or exceeding the pre-pandemic February 2020 levels. The strongest lags in recovery continue to those lower-wage industries that were hardest hit by the state-ordered closures: Arts, Entertainment & Recreation, Accommodation, Other Services, and Food Services. The relative levels of Government and Educational Services continue to be affected by seasonal factors as schools began reopening in August.

### Employment Recovery by Region

Comparing August employment to pre-pandemic February 2020, Los Angeles Region lagged behind the rest of the state in employment recovery, showing a loss of 8.9% and containing 43% of the total employment shortfall in the state compared to 29% of the total population.
