Fuel prices continued dropping in August from their previous highs, but California regulations sealing off the state from the broader global market supplies again resulted in somewhat lower drops compared to the rest of the US. Prices have since risen at a more moderate pace. In the latest price data from [CSAA](#), regular gasoline rose to an average of \$5.67 a gallon on Labor Day, compared to \$3.79 for the US and \$3.27 in Arkansas, the lowest price state.

Electricity costs continued their rise in June, with residential rates (12-month moving average) again the highest among the contiguous states and the average household electricity bill moving from 21<sup>st</sup> to 20<sup>th</sup> highest among the states and DC. California households and employers paid an additional \$24.2 billion compared to the average rate for the rest of the US as the result of California's energy policies, and \$31.1 billion compared to electricity rates in the lowest cost state.
