Employment Share by Region

The following chart compares change in employment (compared to pre-COVID February 2020) vs. population share as a measure of the disparate economic effects from the social distancing measures. Los Angeles Region, which experienced relatively greater job creation in lower income, population-serving and tourism industries during the recently ended expansion period, accounted for just under half of the employment loss in October. Regions such as the Bay Area and San Diego with a greater incidence of jobs amenable to telework have been slightly less impacted. Regions such as the Central Valley and Inland Empire with a higher degree of essential businesses but also effects from seasonal factors have shown somewhat greater resiliency.

MSAs with the Worst Unemployment Rates: Los Angeles Remains 6th Worst in Nation

California had 11 MSAs among the 25 regions with the worst unemployment rates in September. As a result of a pattern of jobs growth in recent years that concentrated on the hardest-hit lower wage, population-serving and tourism service industries in Los Angeles County, Los Angeles-Long Beach-Anaheim MSA (Los Angeles and Orange Counties) remained the 6th worst in the nation.
